# HANA

The innovative full-fledged telemedicine platform for accessible and affordable healthcare anytime, anywhere

INTRODUCTION

HANA is a B2B telemedicine platform that empowers hospitals and healthcare providers to provide comprehensive telemedicine systems with high-quality, patient-centric care for their patients via real-time video conferencing.

This platform emulates the face-to-face instruction environment and consists of the following features during a telemedicine consultation: video conferencing, two-way screen sharing, real-time photo taking, chatting/typing, hand-writing, co-browsing of the web/documents, and annotation of data.

Our mission is to build accessible and affordable healthcare for everyone anytime, anywhere via our innovative telemedicine platform to every person in the world, and as a result, to empower humankind to live healthier lives.

KEY FEATURES

HIGH-QUALITY VOICE/VIDEO
HANA features high-quality HD video and audio to ensure you and your patient have the best experience possible.

TWO-WAY SCREEN SHARING
The real-time two-way screen sharing feature allows clinicians to share their desktops, websites, power-point. presentations, and online resources.

REAL-TIME PHOTO TAKING
If you love using books, flashcards or objects but aren't sure how to fit them into your sessions, we've got you covered. Simply use the device camera to take photos and share it with your patients instantly.

INTERACTIVE WHITEBOARD
HANA offers endless possibilities for telemedicine sessions with tools for drawing, painting, highlighting and much more! Use them for explaining complex concepts, problem-solving, exercises or therapeutic activities.

SESSION HISTORY
HANA automatically keeps track of every session on the blockchain so you can rest assured that you will have full legal compliance, transparency and open verification.

POST-SESSION DOCUMENTATION
Keep an up-to-date record of your patients' progress by saving notes after each session. Your notes are not visible to the patient and are stored securely.
