BIOGRAPHY

BRANDON VAN HAVEREN earned his degree in Construction Management from Colorado State University. He launched his career as a Project Engineer on one of the largest privately funded construction projects in the United States. He later joined the nation's largest concrete contractor, where he supported the construction of a nuclear enrichment facility for more than four years. During his tenure, Brandon held a range of key roles, including Project Engineer, Inventory Control Manager, Lead P6 Scheduler, Assistant Project Manager, and Procurement Manager.

He continued advancing in project management with an ENR Top 100 General Contractor in the Phoenix area, serving in positions such as Senior Project Engineer, Lead P6 Scheduler, Conflict Resolution Manager, and progressing from Assistant Project Manager to Project Manager on projects exceeding $100 million.

As Managing Consultant of the West at 360 Building Group Consulting, Brandon has provided expertise on numerous catastrophes, including Hurricanes Harvey, Delta, Laura, and Ian, the Northern and Southern California wildfires, and the Dallas freeze. He has also consulted on a wide range of losses involving commercial properties, high-end residential projects, and builders risk claims.
