EDUCATION

California Polytechnic Univ. Pomona

- Bachelor of Science, Business Administration / Finance

BIOGRAPHY

CAMERON RICHARTZ holds a Bachelor of Science in Business Administration – Finance from California Polytechnic University, Pomona, and has nearly two decades of experience across the construction and property consulting industries. He began his career in the field working as an Engineer, Project Manager, and Superintendent on complex projects spanning rail, transportation, heavy-civil, government, commercial, and industrial sectors. Prior to entering the consulting field, Cameron served as a Project Manager on the $160 million Middle Harbor Terminal Redevelopment Project in Long Beach, CA, one of the largest port infrastructure projects in the country.

In 2021, Cameron co-founded 360 Building Group Consulting (360BGC), applying his construction management background to the evaluation of property damage, repair scope development, and construction cost analysis. As a Partner at 360BGC, Cameron plays a central role in the firm's strategic direction, operational development, and growth initiatives. In addition to consulting on high-value and complex property losses, he focuses on expanding the firm's national presence, deepening client relationships, and building out 360BGC's consultant network. Cameron holds IICRC certifications in Water Damage Restoration and Fire & Smoke Restoration, and is HAAG Certified for both residential and commercial roof inspections.
