BIOGRAPHY

JEREMY AIKEY is a Managing Consultant at 360BGC with over two decades of progressive experience in construction management, project delivery, and operational leadership. His career spans commercial and residential construction, insurance restoration, and healthcare facility buildouts, having held senior roles within the industry across multiple organizations. Jeremy holds certifications including OSHA 10, IICRC (WTR, ASD, FSRT), Xactimate Level 2, and Lead Based Paint Safe Practices — equipping him with both the technical credentials and field-level expertise to advise clients across the full construction lifecycle.

In Jeremy's prior executive role, he managed office operations with EBITDA accountability exceeding $20M, overseeing recruiting, training, and KPI reporting. As a Senior Project Manager, he served as the primary liaison for a major hospital system's project managers and directors across multiple campuses, managing estimating, design coordination, and multi-trade field teams. At 360BGC, Jeremy brings this hands-on leadership and executive-level business acumen to clients seeking expert guidance on project management, cost control, contractor coordination, and construction program oversight.
