If the laboratory report on the analysis of any sample indicates a presence of forbidden drugs, this shall be evidence such substance has been administered to the animal(s) either internally or externally. It is presumed that the sample tested by the laboratory to which it is sent is the one taken from the animal in question, its integrity is preserved and all procedures of said collection and preservation, transfer to the laboratory and analysis of the sample are correct and accurate and the report received from the laboratory pertains to the sample taken from the animal in question and correctly reflects the condition of the animal at the time the sample was taken, with the burden on me, my parent(s) and/or guardian to prove otherwise.

K. I am responsible for my exhibit and I will not allow others to violate this Code on my behalf. By my entering an exhibit in this Fair I will accept any disciplinary action taken by the Management of the Iowa State Fair for any violation of this Code of Ethics and any other rules of competition of the Fair without recourse against the Iowa State Fair.

During the taking of the sample from an animal, the exhibitor, owner or representative of the owner or exhibitor may be present and witness the taking of the sample and so signify in writing by signing the collection form in the appropriate location. Until transported to the laboratory for analysis, samples shall be kept in a secure facility at the Iowa State Fairgrounds under the supervision of the State Fair Veterinarian. No unauthorized person shall be admitted at any time to this location.
