REVOLUTION DRONES

## 600 ACRES

Maximize your application window with rapid charging and high-volume cycles

## 31 MPH

coupled with a 40-foot spray swath covering a greater width at a faster speed

## 20 GALLON TANK

High-volume capacity for fewer refills ensuring non-stop productivity during peak season

## 360° RADAR

+ RTK Accuracy - Pinpoint  $\pm 4$  inch precision in all terrain navigating uneven, muddy, or otherwise inaccessible areas

## INDUSTRIES BEST

industry-leading warranty

# I-19 by Revolution Drones

### Benefits for Farmers:

- Reduce Input Losses
- Lower Operating Costs
- Unmatched Terrain Access
- Multi-role Functionality
- Sustainable Operations

It uses RTK 4-inch precision to accurately spray 20 gallons of liquid or spread 26 gallons of solids, virtually eliminating chemical and seed waste. The I-19 can easily navigate and operate in wet, uneven, or inaccessible terrain where a ground sprayer would get stuck. This versatility allows you to switch between spraying, fertilizing, and seeding, all while drastically lowering fuel and labor costs and ensuring your operation is the most efficient and sustainable in the field.
