Course Outline | Dreamweaver Advanced

1 day(s)

Overview

You are familiar with creating web pages and now you will enhance the web pages by means of adding advanced functions such as navigational controls, media elements, and forms. Also, it is essential to ensure that your websites are compatible with various modern day display devices such as mobile phones, tablets, and smartphones. In this course, you will create fluid CSS layouts, implement mobile integration techniques, and share files over a server to work in a collaborative manner. All this will ensure that you develop a website that helps retain user interest by means of providing an engaging user experience across multiple display devices.

Objectives

- Identify website requirements
- Create layouts
- Format web pages
- Create forms
- Integrate media files with Dreamweaver
- Manage website files

Target Student

This course is designed for web designers, web developers, and graphic artists who would like to expand on their existing Dreamweaver knowledge and skills. The advanced concepts and skills covered in Adobe Dreamweaver Advanced will enable a designer to create interactive web pages and websites efficiently.

Prerequisites

Before taking this course, it is recommended that the students take up the Adobe® Dreamweaver® CC: Part 1 course or have equivalent knowledge.
