Course Outline | Excel Introduction

1 day(s)

Overview

This course will provide you with the foundational Excel knowledge and skills necessary for business today. As you apply the robust functionality that's part of Excel to your organization's raw data, you will be able to gain a level of insight into that data that would have been almost impossible years ago. Excel helps you organize, calculate, analyze, revise, amend, and present your data in ways that will help you and the decision makers in your organization steer forward in the right direction

Course Requirements

Learners must be confident using a mouse and keyboard.

What will you learn

In particular you will be able to:

- Get working with Microsoft Excel efficiently and effectively
- Perform calculations
- Optimize your worksheets by creating and using formulas
- Modify worksheets to manipulate and edit data
- Format and style worksheets to get more impact from data
