

Course Outline | InDesign Interactivity and Animation

1 day(s)

Overview

This course is designed to maximise the expansive interactivity and animation features of InDesign. Using the new features of Adobe InDesign, you can extend its capabilities to sophisticated presentations and animated online documentation.

Prerequisites

Whilst the course assumes no prior knowledge, a basic familiarity with the InDesign environment will be beneficial (or have used earlier versions of the program) and wish to gain a good working knowledge of the interactivity and animation capabilities.

Course Outline

An Overview of the Working Panels and Views

- Working with the Preview Panel
- Creating Documents with Interactive Features
- Working with Live Captions

Cross-Media Production

- Working in Presentation Mode
