

# Course Outline | Web Design with XHTML HTML and CSS Level 2

---

1 day(s)

## Description

You know how to create a basic website. However, for your website to be successful, it must stand out from the crowd and attract visitors. In this course, you will learn skills that will be instrumental in creating advanced web pages and testing their validity.

## Target Student

This course is designed for people who understand the fundamentals of XHTML, HTML, and CSS and have used the three technologies to create basic web pages. It is aimed at individuals interested in using these technologies to create advanced web pages and test their validity.

## What Will I Learn

- How to create web page layouts. Manage CSS.
- Test a website. Create advanced navigation. Incorporate meta-content and multimedia.
