

Languages in B2B Edition: Everything You Need to Know

Backend:

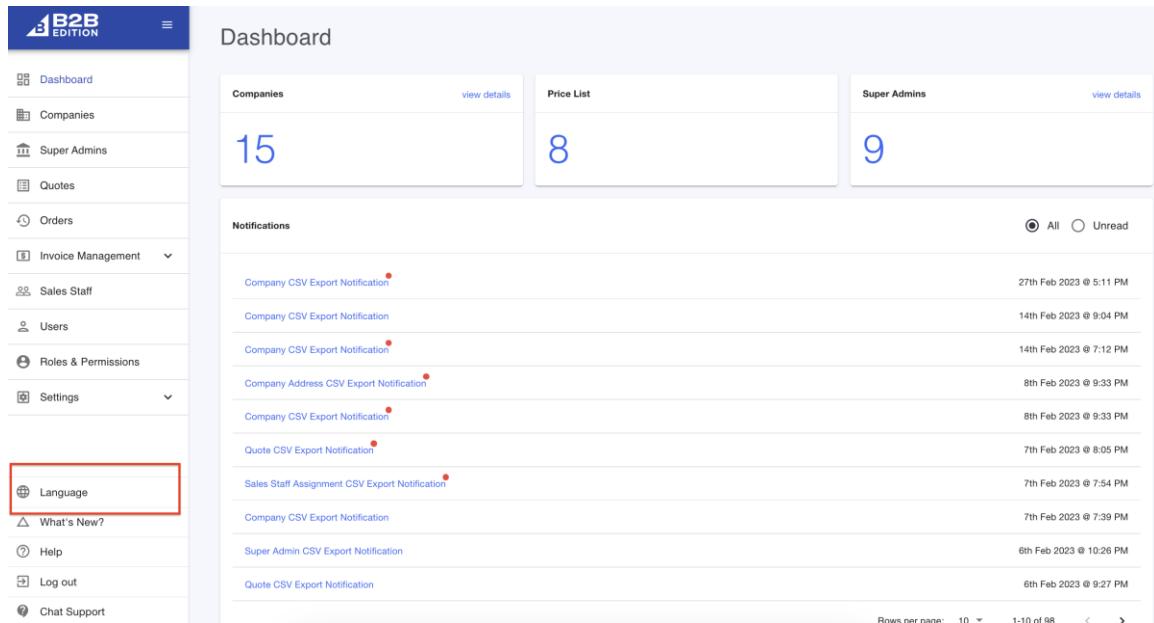

The B2B Edition application can currently be translated to 7 different languages at this time. Only the static text will be changed to the desired language you have set it at.

Supported Languages:

- English
- Chinese
- French
- Dutch
- German
- Italian
- Spanish

How to Change the Language:

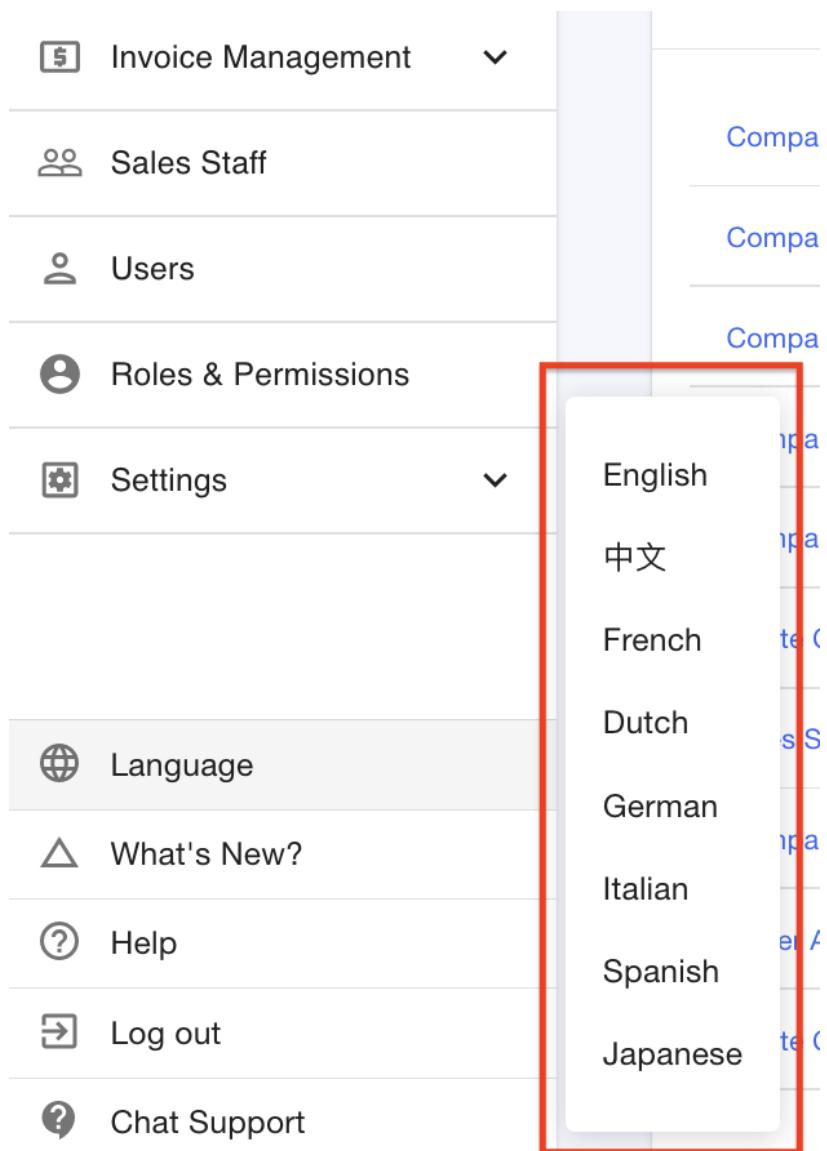

1. Inside the B2B Edition application, click on the globe icon in the bottom left hand corner

The screenshot shows the B2B Edition application's dashboard. On the left, there is a vertical sidebar with various menu items: Dashboard, Companies, Super Admins, Quotes, Orders, Invoice Management, Sales Staff, Users, Roles & Permissions, Settings, Language (which is highlighted with a red box), What's New?, Help, Log out, and Chat Support. The main content area is titled "Dashboard" and contains three large boxes: "Companies" (15), "Price List" (8), and "Super Admins" (9). Below these is a "Notifications" section listing several recent notifications, each with a timestamp. At the bottom right of the dashboard, there are links for "Rows per page: 10" and "1-10 of 98".

Notification Type	Date
Company CSV Export Notification	27th Feb 2023 @ 5:11 PM
Company CSV Export Notification	14th Feb 2023 @ 9:04 PM
Company CSV Export Notification	14th Feb 2023 @ 7:12 PM
Company Address CSV Export Notification	8th Feb 2023 @ 9:33 PM
Company CSV Export Notification	8th Feb 2023 @ 9:33 PM
Quote CSV Export Notification	7th Feb 2023 @ 8:05 PM
Sales Staff Assignment CSV Export Notification	7th Feb 2023 @ 7:54 PM
Company CSV Export Notification	7th Feb 2023 @ 7:39 PM
Super Admin CSV Export Notification	6th Feb 2023 @ 10:26 PM
Quote CSV Export Notification	6th Feb 2023 @ 9:27 PM

2. Selected the desired language

3. Review the tabs and translated static texts (screenshot is the Chinese translation)

The screenshot shows the B2B Edition dashboard. On the left is a sidebar with navigation links: 仪表盘, 公司, 超级管理员, 报价, 订单, 发票管理, 销售人员, 用户, 角色和权限, 设置, 语言, 什么是新的?, 帮助, 退出登录, and 聊天支持. The main area has three large boxes: '公司' (15), '价格表' (8), and '超级管理员' (9). Below this is a '通知' (Notifications) section listing various CSV export notifications from different users and dates. At the bottom right of the dashboard are pagination controls: 每页行数: 10, 1-10 of 98, and navigation arrows.

Frontend:

The backend setting does not change the frontend language. To change the B2B Edition features' text on the frontend, there are a couple of different ways:

Customize storefront multi-language using B2B Edition JS API

There are two methods to customize the language(s) for B2B Edition:

1. We recommend using [useText](#) API if you only need to modify the display text with a single language.
2. Please use the B2B Edition locale solution below to customize multi-language.

Usage

1. Create `assets/js/theme/{relative-path}/b3lang.js` using the code below:

All available storefront language keys could be found in [b3lang.js](#)

```
export default {
  // language key: we recommend to follow the ISO language codes (ISO-639)
  // and country codes (ISO-3166) rules for language key.
  zh: {
```

```

    // navigation button text
    'nav.button.dashboard': '仪表盘',
    'nav.button.quotes': '报价',
    'nav.button.userManagement': '用户管理',
    'nav.button.buyAgain': '再次购买',
    'nav.button.addressBook': '地址簿',
    'nav.button.quickOrderPad': '快速购买',
    'nav.button.shoppinglists': '采购清单',
    'nav.button.quotesList': '报价列表',
    // .....
  },
en: {
    // navigation button text
    'nav.button.dashboard': 'Dashboard',
    'nav.button.quotes': 'Quotes',
    'nav.button.userManagement': 'User Management',
    'nav.button.buyAgain': 'Buy Again',
    'nav.button.addressBook': 'Addresses',
    'nav.button.quickOrderPad': 'Quick Order Pad',
    'nav.button.shoppinglists': 'Shopping Lists',
    'nav.button.quotesList': 'Quotes',
    // .....
  }
// .....
}

```

Links:

Language Codes: [ISO-639](#)

Country Codes: [ISO-3166](#)

2. Import the assets/js/theme/{relative-path}/b3lang.js to assets/js/theme/global.js using the code below:

```

// other code

+ import b3lang from '{relative-path}/b3lang';

export default class Global extends PageManager {
  onReady() {
    // other code
    window.b3themeConfig = window.b3themeConfig || {}

    // config the lang key: To config the lang key, B3 will use the browser language keys to find the language config from window.b3themeConfig.locale automatically if the lang key is not found from the js. The default language (English) will be used for the storefront if all the browser language keys don't match one of the keys in window.b3themeConfig.locale.
    + window.b3themeConfig.lang = 'en'
    + window.b3themeConfig.locales = b3lang
    // other code
  }
}

```

```
    }  
}
```

Customize checkout multi-language using Script Manager

1. Download template([lang.js](#)), customize the languages on demand.
2. Create a script by [script manager](#), copy and paste the script content from the lang.js.

You can also change part of language by overriding the default language on demand.

```
window.B3checkoutLanguageConfig = {  
    "locales": {  
        "en": {  
            "address": {  
                "address_line_1_label": "Address",  
                "city_label": "City",  
                "city_required_error": "City is required",  
            }  
        }  
    }  
}
```

Customize checkout multi-language using Script Manager (v3.3.0)

1. Download template([lang.js](#)), customize the languages on demand.
2. Create a script by [script manager](#), copy and paste the script content from the lang.js.

You can also change part of language by overriding the default language on demand.

[**Bigcommerce Multi-Language Checkout**](#)

```
// Bigcommerce checkout text config  
window.B3checkoutLanguageConfig = {  
    "locales": {  
        "en": {  
            "address": {  
                "address_line_1_label": "Address",  
                "city_label": "City",  
                "city_required_error": "City is required",  
            }  
        }  
    }  
}
```

```
// B2B Edition checkout text config
window.b3CheckoutConfigTips = {
  "b3.login.failed": "Login Failed.",
  "b3.salesRep.notMasquerading": "Please select a company.",
  "b3.poinput.title": "PO Number / Reference Number (Optional)",
  "b3.addresses.search": "Search addresses",
  "b3.addresses.addressLabel": "Address Label",
  "b3.addresses.enterNew": "Enter a new address",
  "b3.addresses.select": "Select an address",
  "b3.multiShipping.address.edit": "Edit",
  "b3.multiShipping.address.remove": "Remove",
  "b3.multiShipping.shipped.toAddress": "can be shipped to another
address.",
  "b3.poNumber.label": "PO Number / Reference Number",
  "b3.label.optional": "(Optional)",
  "b3.poNumber.required": "PO Number / Reference Number is required.",
  "b3.field.required": "Please Input"
}
```
