

CompoundHunter Drug Discovery Process

Stage 1
Your Protein(s)

You provide us the protein name, sequence or PDB

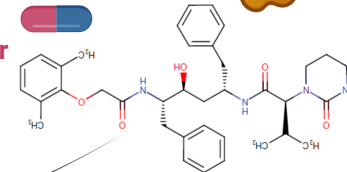

We can employ *ab initio* or homology modeling

Stage 2
Our Ligands or Yours

11,000+ or your selected ligands

FDA & EMA Approved, Experimental Drugs or your ligand names, SDF or PDB

Stage 3
CompoundHunter Docking

Docking of each ligand one by one using our proprietary AutoDock Pipeline

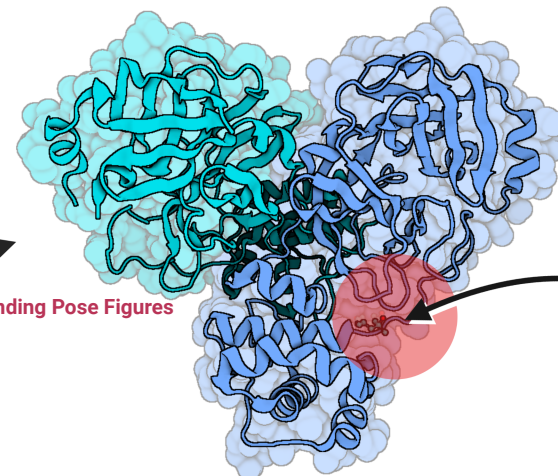

Stage 4
Binding Affinities of Each Ligand

CSV, PDF, PNG Reports

We provide extensive reports of each ligand's binding affinity against your protein(s)

Stage 5
Top 10 Compounds

Top Ligands
