

MINE STAR XL

MINE STAR XL

MINE STAR XL is a bias-ply tyre particularly suitable for load haul dumps (LHD) in underground loading and hauling operations. The wide tread design with open lugs avoids stone trapping and provides exceptional traction. The larger footprint makes MINE STAR XL your best ally for heavy-duty underground mining operations. MINE STAR XL is made of a special tread compound that ensures extraordinary cut and chip resistance, providing increased operational efficiency as well as an extended tire life-cycle and reduced machine downtime.
