

ROCK SPECIAL (L-4)

ROCK SPECIAL (L-4)

ROCK SPECIAL (L-4) is a bias-ply tire engineered for loaders operating in severe mining and quarry applications. The extra deep rock pattern delivers excellent traction even under harsh operating conditions, while the wide footprint ensures great stability and operator comfort. ROCK SPECIAL (L-4) features a steel-belted heavy-duty casing and a particularly cut- and-chip-resistant tread compound to provide excellent protection against external damage. The tire stands out for durability and reduced downtime, making it the ideal choice for the toughest requirements in rocky environments.
