RADIAL OTR TIRES

EARTHMAX SR 36

EARTHMAX SR 36 (E3***) is an All-Steel radial tyre specially designed for dump trucks operating in mining, quarry, logging, or haulage applications. The non directional rock tread pattern provides excellent traction and stability on all types of terrains, especially on wet, boggy and muddy grounds. The open tread design also ensures excellent self-cleaning properties that are essential for a smooth transition between different types of surfaces during transport.
