

MULTIFORCE BK T91

PRODUCT DATA SHEET

BKT MULTIFORCE BK T91

 MULTIFORCE BK T91 is BKT's brand-new industrial rubber track series for compact track loaders (CTL) employed in material handling applications. The tread is made of a high-performance compound that ensures maximum resistance against cuts, tears, and abrasion. The aggressive, C-shaped tread pattern provides superior handling and excellent traction on all terrains. The track is, indeed, suitable for a variety of surfaces on and off the road such as clay, mud, asphalt, gravel, and sand. It also provides optimal flotation on hills or slopes. MULTIFORCE BK T91 features a dual forged metal core for strength and excellent durability. In addition, the endless belting design of high tensile steel cords ensures better dimensional stability and excellent performance in extreme conditions. In a nutshell, the new track is a reliable partner that ensures a long product life even under extreme service conditions.
