## PREFACE

H.H. The Emir, Sheikh Khalifa Bin Hamad Al-Thani and the Heir Apparent Sheikh Hamad Bin Khalifa Al-Thani have provided continuous and unlimited support to a committee formed within the Qatar Race and Equestrian Club which regulates the registration of pure Arab Horses. This strong support has led the committee and club members to multiply their efforts in upgrading their standards to the level of the international organisation, WAHO (World Arab Horse Organisation) and its member countries. These efforts have paid dividends in the form of WAHO's recognition of the Stud Book -VOLUME I- of pure Arab Horses from Qatar.

In response to this recognition, the committee has also begun listing the blood types for Qatari horses and for other registered horses which have been imported from countries not identifying such blood categories. In addition, the committee has initiated the process of identifying horses with a cold iron device (freeze brand) which was imported specifically for this purpose and recognised by WAHO.

Furthermore, the Arab Horse Registration Committee places all of its administrative, technical and scientific abilities at the disposal of the horse owners and club members. The purpose of this is to assure pure blood lines and healthy reproduction potential resulting in increased numbers of authentic Arab horses in Qatar.

Other services performed by the committee include issuing bulletins and instructions necessary for keeping records of horse breeding and reproduction, importing, exporting and other vital statistics. All of these should improve the relationship between the club and arab horse owners and breeders. Lastly, the committee is introducing -VOLUME II- of the Stud Book of pure Arab horses.

## INTRODUCTION

Relying on the help of Allah the All mighty, the Pure Arab Horse Registration Committee of the Qatar Race and Equestrian Club has issued the Stud Book -VOLUME II- of the pure Arab Horses in the State of Qatar. This book is divided into four sections.

The first section includes the Qatari horses that were born from stallions and mares registered in the Volume I and Volume II Stud Books. These horses are registered according to their ages, starting with the oldest and ending with the youngest. They were given serial numbers beginning with the number one hundred thirty two (132), which follows the last number mentioned in Stud Book Volume I, one hundred thirty one (131).

The second section includes the Arab Horses that were imported from countries having Stud Books recognized by the international organization WAHO. These horses are registered according to the dates they were imported to Qatar with serial numbers following those of the Qatari Arab horses mentioned earlier in section one of this book. The last horse imported was assigned the number -398-

The third section includes Arab horses exported from Qatar to various foreign countries, these being previously mentioned in volume one and two of the Stud Book.

The fourth and final section includes horses from Volume one and two of the Stud Book which have died.

The book's index lists the names of horses alphabetically which were registered in section one and two of this Stud Book.
