## PREFACE

This volume covers the period of 2000 to 2003; it includes all horses born and imported between the said period and few late registered horses not included in volume 4. All the breeding stock in Qatar are DNA typed and parentage verification is compulsory for the foals since 1998. More than 90 percent of horses standing in Qatar have been microchipped, we were using Trovan system up to 1/1/2006 and after that date ISO system microchips are being used. The following is statistical analysis of the horses entered in this volume.

	1996	1998	1999	2000	2001	2002	2003
<b>Males</b>	2	1	2	68	78	82	78
<b>Females</b>	-	1	6	80	66	91	74
<b>Foals by foreign stallions or imported in Utero</b>	1	-	1	4	2	18	4
<b>Total No. of foals</b>	3	2	9	152	146	192	156
<b>Imported Males</b>	3	-	-	10	32	17	19
<b>Imported Females</b>	5	-	-	11	42	18	32
<b>Total No. of imported horses</b>	8	-	-	21	74	35	51

This stud book is based on date of birth of the foal and for imported horse the date of import and not by their registration numbers. Due to this the reader may find gaps while examining the horses by their registration numbers, the missed horses will be included in stud book volume 6.

Breeders and owners are requested to examine the entries of their horses and to notify the registration department of any errors in order that these may be corrected.

The Qatar Arabian Stud Book Volume 5 was compiled by Abdul Aziz Jassim Al Boenain
