GROWING TOGETHER

FORESTLAND

PRODUCT DATA SHEET

Bias

FORESTLAND

UK FORESTLAND is BKT's latest and innovative agro-forestry pattern. This bias tire has been specifically designed for heavy-duty service in forestry applications but, it can also be employed in some agricultural operations such as landscaping and light mulching. FORESTLAND is a particularly robust tire thanks to its strong polyester casing. Moreover, the special cut-and-chip resistant tread compound along with the strong sidewall ensure a long tire life even under the harshest operating conditions. Whilst the open shoulder design provides excellent traction on loose soil, the particular tread pattern and its stiff and reinforced lugs stand for good grip in any soil along with top self-cleaning properties. In addition, the strong bead construction ensures a high level of stability in heavy-duty operations.
