

LIFTMAX LM 81

LIFTMAX LM 81 has been specifically designed and engineered for heavy forklift. Its aggressive and robust tread pattern together with the unique Antistatic tread compound ensures excellent wear properties and a long service life. The strong All eel casing and the reinforced sidewall provide maximum stability and handling ring lift mode, together with superior traction. In addition, its radial casing absorbs surfaces irregularities to provide better riding comfort and increase operator's confidence. LIFTMAX LM 81 is Antistatic compliant, and all its sizes are capable of dissipating static charge from the vehicle.
