

## AW 715

### Description

AW 715 is a high-performance radial tire for a wide range of agricultural implements designed for maximum operational efficiency and transport performance. The steel-belted construction enhances durability and stability, as well as resistance to punctures and stubble damage. The large contact patch combined with a rounded shoulder design protects grassland and reduces soil compaction, while the grooved tread design delivers superior traction on varied terrain. AW 715 features a robust carcass supporting heavy loads at speeds up to 65 km/h (40 mph), making it ideal for demanding agricultural operations and transport applications. This tire also stands out for smooth rolling, while the low aspect ratio further improves flotation.
