

EARTHMAX SR 34

EARTHMAX SR 34 is an All Steel radial tire specially engineered and designed for rigid dump trucks working in several operations like mining, quarry, logging and haulage. The non-directional block tread pattern provides excellent traction and stability on any type of terrain. EARTHMAX SR 34 is ideal for handling heavy loads. The strong All Steel casing features excellent wear and resistance to any snag and punctures. Its reinforced bead and the shoulder design contribute to an extended tire life-cycle even under the most heavy-duty service conditions.
