

LIFTMAX LM 63

LIFTMAX LM 63 has been specially developed for industrial and logistics operations. The All-Steel radial tyre features a strong casing reinforced by multilayer steel belts that reduce vibration while providing enhanced stability and comfort. LIFTMAX LM 63 features a 3-rib tread design that ensures low rolling resistance as well as good wet grip and uniform tread wear, delivering improved handling performance. In addition, the deep tread extends the tyre's service life.
