

Farm-IQ Pro

PRECISION FARMING MADE EASY

Farm-IQ Pro is the next-generation data management and mapping platform built for modern farm operations.

Fast - Flexible - Fully focused on your field

Farm-IQ Pro represents the next evolution in precision farming software—built on a foundation of decades of agricultural technology expertise and continuous innovation.

Now brought to market by Farm-IQ, this powerful platform has been refined over years of development to meet the ever-changing demands of modern farming.

Designed with both simplicity and flexibility in mind, Farm-IQ Pro makes advanced precision farming tools accessible and intuitive. Whether you're an agronomist, contractor, or grower, the software empowers you to optimise operations with tailored solutions that suit your unique workflow.

In an industry where efficiency, adaptability, and ease of use are essential, Farm-IQ Pro stands out as the smart choice for those looking to stay ahead in precision agriculture.

Soil Sampling

- Pre-planned / In-field sampling
- pH, Nutrient and PCN mapping
- View sample locations

Add Sampling Results

- Enter Lab and sample results
- Select soil analysis template

Sample Results for Show Field

Sample Results
16/12/2023 - pH, P, K, Mg - Normal Grid

Result Date
16 December 2023

Sample No.	pH	P	K	Mg
1	6.2	8	25	101
2	6.1	9	28	106
3	5.9	10	32	105
4	5.8	11	35	105
5	5.6	12	42	109
6	6.2	13	45	110
7	6.1	14	46	120
8	6.3	15	25	100
9	6	16	35	136
10	5.7	17	35	145

☒ Create Contour Maps

Buttons: Delete, Save, Cancel

Create Maps

- Build Nutrient and Variable Rate maps
- Export as Shapefile or ISOXML

Build Custom Reports

- Fully customisable with data and logo
- Save reusable templates
- Multi section reports
