

Could someone advice on whether ipi mocap studio has a 25 dollar trial version. A: I'm afraid there isn't, sorry. IpiMocapStudio Keygenar Q: Concise way to print an array if the input is 0, while returning error in case of 1 Let's say we have an array: int my_array[] = { 0, 1, 2, 3 }; We also have an argument, the index for which we want to check whether the corresponding value in the array is 0 or not. int get_value(int index) { int value = my_array[index]; return value; } The main function should return error in case of an index that is less than 0 or an index that is greater than or equal to the number of elements in my_array. int main() { int index = 0; if (index < 0 || index >= sizeof(my_array) / sizeof(my_array[0])) return 1; get_value(index); return 0; } What is the most concise way to do this? A: This is good use case for std::algorithm with check predicate. int main() { std::vector my_array = { 0, 1, 2, 3 }; int check = 0; if (std::algorithm(my_array.begin(), my_array.end(), [&check](int i){return i==my_array.size();}, check)) return 1; get_value(check); return 0; } In case you want to print a message, then just replace the return 0 with: std::cout << "2008-09 English Premier League The 2008-09 English Premier League (also known as the 2008-09 FA Premier League for sponsorship reasons) was the 23rd season of the Premier League, the highest division of English football. Chelsea won their tenth title. Teams The top
