# Mountain Ranges in World for Banking & SSC Exam - GK Notes in PDF

The rock and sand deposits through the rivers which over the large time period are converted into large land forms called **Mountains**. Mountain ranges in world play a crucial role in our life by altering the weather pattern and climatic conditions. They are also rich in endemic species and has great impact on Natural Ecosystem of the country. In recent years, mountain ranges in world have undergone several harsh conditions in the recent years.

The rising temperatures caused by the melting of mountain glaciers at unprecedented rates, has affected freshwater supplies for millions of people. Considering the much required attention towards the sustainability of mountains, the UN General Assembly declared 2002 as the UN International Year of Mountains. On this occasion, the UN General Assembly designated 11 December as “International Mountain Day”. From 2003 onward, each year **December 11** is celebrated as International Mountain Day throughout the world. Every year a theme is assigned to this day, the theme for 2018 was **#MountainsMatter**.
