

# Introducing Cisco Multicloud Certifications

Prove you have what it takes to deploy, secure, manage, and monitor complex public and private multicloud networks

## It's time to expand your multicloud expertise

Migration from private to public and hybrid clouds continues at a breakneck pace. You can capitalize on this trend by developing and validating your knowledge and skills in the rapidly growing fields of cloud connectivity, secure cloud, and cloud network infrastructure.

85%

Of companies will have containerized applications in production by 2025<sup>1</sup>

50%

Of mission-critical applications reside on public clouds

80%

Of enterprises surveyed already have a multicloud strategy<sup>2</sup>

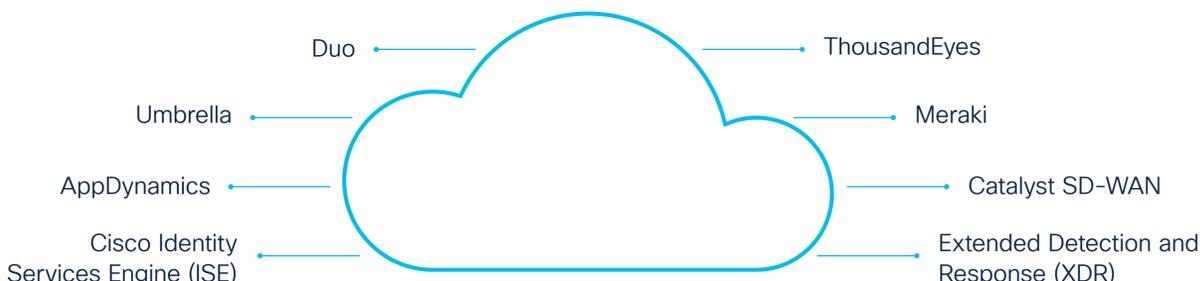

According to the Cisco 2022 Global Hybrid Cloud Trends Report, 93% of organizations now operate in multicloud environments

## Connect. Secure. Observe.

### Showcase your skill set

If you are already working with Cisco cloud and network management solutions like ThousandEyes, Meraki, or Catalyst SD-WAN, you may have the skills needed to certify these in-demand skills and amp up your professional reputation.

## Develop your expertise

Elevate your tech game by exploring the range of official multicloud training courses offered by Cisco. These courses are accessible worldwide and come in various formats, including instructor-led classes, online e-learning modules, and flexible, on-demand learning paths. These courses are designed to both introduce you to new concepts and elevate the existing knowledge base of you and your organization.

Training Course	Tech Topics	Exam
Designing and Implementing Cloud Connectivity (ENCC)	Architecture Models            Design            IPsec Cloud Connectivity            SD-WAN Cloud Connectivity            Operation	300-440 ENCC
Designing and Implementing Secure Cloud Access for Users and Endpoints (SCAZT)	Cloud Security Architecture            User and Device Security            Network and Cloud Security            Application and Data Security            Visibility and Assurance            Threat Response	300-740 SCAZT
Designing and Implementing Enterprise Network Assurance (ENNA)	Platforms and Architecture            Data Collection Implementation            Data Analysis            Insights and Alerts	300-445 ENNA Live on May 20, 2024

## Discover how a Cisco Multicloud Specialist Certification will advance your IT career

Make yourself more marketable

as an in-demand multicloud expert

Architect optimal solutions

using multiple cloud platforms

Become a credentialed leader

in multicloud migration initiatives

Elevate your profile

above ordinary cloud generalists

Create a path

to your CCNP professional-level certification

## Navigate your goals with Cisco Certifications

Set your sights on a Cisco Multicloud Specialist Certification

- No prerequisites
- Download exam topics
- Build your study plan
- Take exam

## Complete your CCNP Enterprise or CCNP Security Certifications

- Combine a multicloud specialist exam with a core Cisco professional exam to complete your professional-level certification requirements.
- If recertification is your goal, you can earn 40 Continuing Education Credits with each multicloud specialist exam that can be applied towards recertification.
