

ATTITUDE CONTROL SYSTEMS

Our XACT and FleXcore products are currently operating on-orbit, supporting numerous successful customer missions. Get a reliable, high-performance design compatible with a wide range of satellite configurations, all from the most accurate stellar-based attitude solutions. US-made and applicable for DOD applications.

DESIGN

A powerful processing core coupled with our reaction wheel assemblies enable a new generation of peak-performance, cost-efficient miniaturized spacecraft. Configurations allow for a standard three-wheel system with the addition of a fourth wheel for redundancy. The addition of our torque rods and sun sensors further provides a robust and effective ADCS system.

KEY ADVANTAGES

- Precise attitude knowledge & control
- Complete ACS in a micro-package
- Low jitter micro-reaction wheel design
- User-friendly software supports simulation, integration, and customization

BASELINE DELIVERABLES

- User Manual
- Interface Control Documentation
- Command & Telemetry Handbook
- Functional and Performance Test Results
- Certificate of Conformance (Flight Units Only)
- Mission Configuration ICD Addendum

XACT SYSTEM DIMENSIONS

XACT-15
