

Ferns N Petals - E Commerce Cloud Migration

Brio assisted the customer with the entire migration of their overseas workloads, from infrastructure discovery and cost optimization to drafting the architecture on GCP & migrating all the workloads to GCP as per best practices prescribed by Google

The challenge

The customer had three production environments in AWS across the Gulf countries (UAE, Saudi Arabia, and Qatar). These environments had dependencies on other AWS accounts that were not in scope of migration. The challenge was to migrate all overseas environments while keeping the other AWS accounts connections in place with minimal downtime.

The solution

Brio Technologies migrated FnP's AWS accounts to GCP, optimized costs, created a VPN tunnel, and performed a smooth cutover. We analyzed the customer's database with the Google Cloud team and selected an appropriate equivalent for DynamoDB. Compute Engine was made by Brio Technologies via Migrate to Virtual Machines, The applications went live successfully in both environments.

The result

The result of this project was a successful migration of all overseas environments to GCP, while keeping the other AWS accounts connections in place with minimal downtime.

“ We are very pleased with the results of our migration to Google Cloud Platform. Brio Technologies did an excellent job of helping us to understand our options and to plan and execute the migration. The process was smooth and efficient, and we were able to minimize downtime. We are confident that GCP will provide us with the scalability and performance we need to support our growing business ”

Akhtar Sheikh, Infrastructure Lead, Ferns N Petals Pvt Ltd.

About Ferns N Petals Pvt Ltd

Ferns N Petals is a leading florist chain in India with over 25 years of experience in the industry. The company offers a wide range of products and services, including flowers, cakes, plants, personalized gifts, decoration services, and experiences.
