## 1. Executive Summary

Version 5.2.10 includes substantial improvements to the speed and logic of searching, as well as improvements to the display of search results. In addition, enhancements have been made to usability and seven fixes have been implemented, including a fix to address “Sorting in the Complete folder taking too long”.

Below you will find a more comprehensive breakdown of the new functionality and fixes introduced by this version.

- Multiple keywords or search terms can now be used when searching for a document, and wildcards have been added. This allows for partial words to be used when searching. Entering an asterisk (\*) before or/and after your search text will broaden the search. For example, typing two partial words and a wildcard instead of typing the full text – gastroenterology referral – saves valuable time.

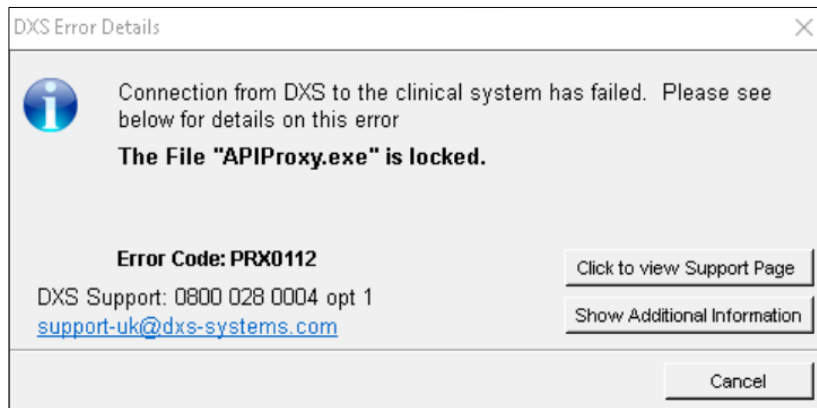

- Search results are now more clearly displayed in categories denoting the type of document, making it much quicker to identify the document you need.

A screenshot of the DXS search results page. The browser address bar shows "Home - LOUW, Vanessa (Mrs) - 507 307 8470". The search bar contains "bre\*" and the search results are displayed in a grid format. The results are categorized into Education (29), Professional (108), Medicines (157), Services (181), and Forms (147). The Professional category is selected, showing a list of results under various sub-categories like Cardiovascular, Diagnostics, Forms and protocols, and Gynaecology. The results list includes items like "DOACs" (Red Whale), "Breast Screening with Mammography" (PatientPro), "Generic Chest X-Ray Referral Form" (DXS Generic Referral Forms), "Asthma Review Form" (Forms and Protocols), "BTS Guideline for Non-Cf Bronchiectasis" (Forms and Protocols), "BTS Guideline On Home Oxygen Use In Adults" (Forms and Protocols), "BTS Guideline on Pulmonary Rehabilitation in Adults" (Forms and Protocols), "Home Oxygen Order Form (HOOF) Part A" (Forms and Protocols), "IG approved FAQ IHORM updated March 2017" (Forms and Protocols), "IHORM and Home Oxygen Consent Form (HOFC)" (Forms and Protocols), "Initial Home Oxygen Risk Mitigation (IHORM) - Supporting Notes" (Forms and Protocols), "NHSE Home Oxygen Letter and Brief (March 2017)" (Forms and Protocols), "Who Analgesic Prescribing Ladder" (Forms and Protocols), "Breast Lumps and Breast Examination" (PatientPro), "Breast Pain" (PatientPro), and "Heavy Menstrual Bleeding - Assessment And Management (NG88)" (NICE Guidance). The footer shows the user "TODD, Emelina (Dr)" with roles "Partner Test CDB29391" and "System Administrator, Clinical Role".

- Improved error messages will be displayed highlighting the cause of an error. This will increase the speed at which an error is resolved by either you or our Support Desk.

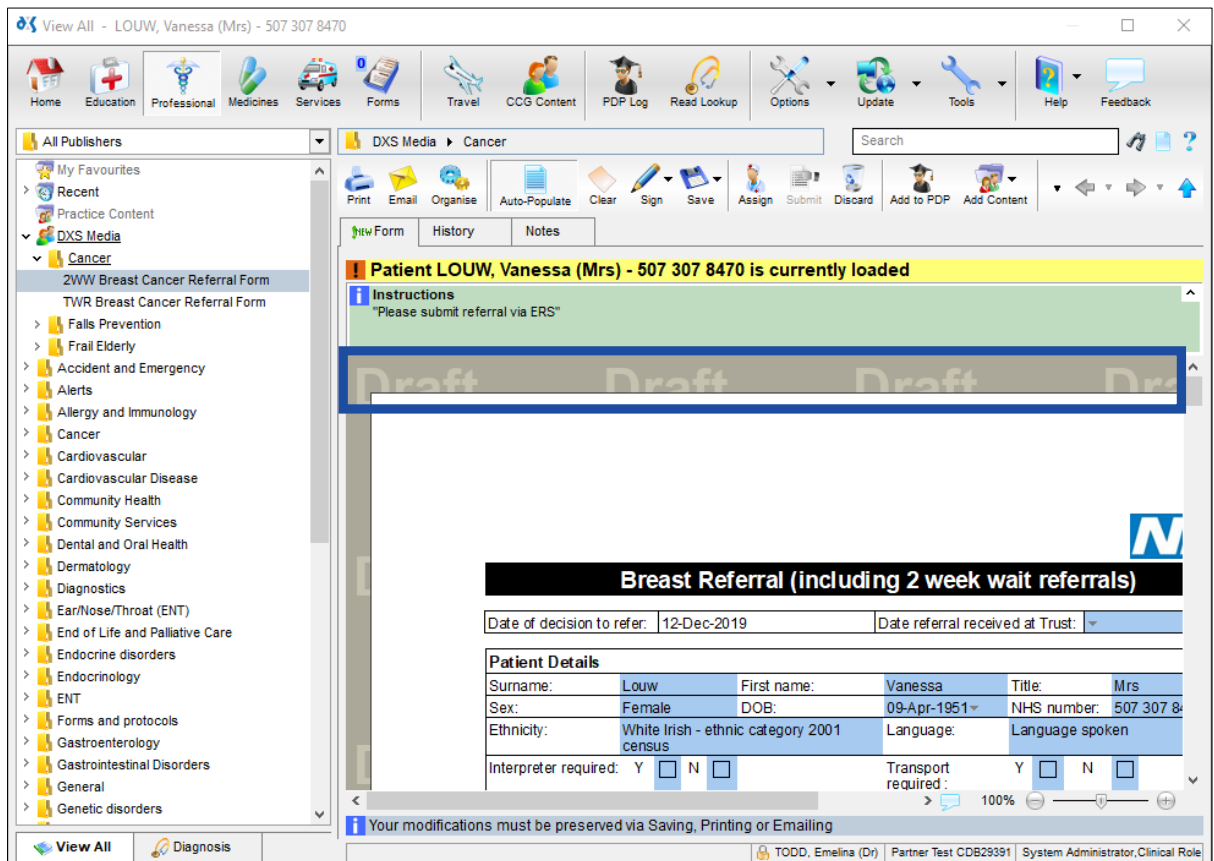

Old Error Message

New Error Message

- The draft watermark is now displayed on the screen around the document, instead of superimposed over the document, which allows for easier editing.

## 2. Product Description

The DXS Point-of-Care™ product is a content aggregator, which integrates with Electronic Patient Record (EPR) software, ensuring a prime position on the healthcare professional's desktop. This allows content providers to have a direct channel to the healthcare provider during the patient consultations. The DXS product enriches the content with its own relationship-linking process, part of which incorporates the appropriate country-specific diagnostic coding system.

The diagnosis is entered into the EPR and information in DXS Point-of-Care™ relating to that diagnosis is automatically populated for the healthcare provider. The healthcare provider is presented with the specific information related to the patient he or she is consulting, without having to search different databases, which expedites the review.

The DXS Point-of-Care™ product contains clinical data on diseases and procedures as well as patient information on drugs and diseases.

## 3. Releases

Status	Version	Release Date	Database Schema
Current Release	5.2.10.	16 December 2019	Version 8 Revision 14
Previous Releases	5.2.7.90	18 October 2019	Version 8 Revision 14

## 4. Notes on Deployment

The upgraded files will be released electronically and will be downloaded with the daily content update. Version 5.1.5 onwards has the functionality to automatically update when the clinical system is closed and reopened after receiving the files.

## 5. System Requirements

### 5.1 Recommended Specification

DXS Point-of-Care	Recommended Requirements
Processor	Intel i3 or better
RAM	2GB RAM
Workstation – HDD – Free Space	200MB
Server – HDD – Free Space	4GB (Growth detailed in Operating Environment Guidance document, paragraph 2.5)
Resolution	1280 × 720
Display	32-bit Colour
Operating System	Windows Vista, 7, 8, 8.1, 10 supported
Internet Connectivity	Required (HTTP access to uk.dxs-systems.com. HTTP GET and POST Methods allowed)
Internet Speed	5MB (Download), 2MB (Upload) – Please see below for practices that have branch sites

### 5.2 Remote Database Server Specification

The below Internet speeds are our minimum requirements if a branch site connects remotely via a WAN to the same database as the main site.

DXS Point-of-Care	Recommended Requirements
Processor	Intel i3 or better
RAM	2GB RAM
Workstation – HDD – Free Space	200MB
Server – HDD – Free Space	4GB (Growth detailed in Operating Environment Guidance document, paragraph 2.5)
Resolution	1280 × 720
Display	16-bit Colour
Operating System	Windows Vista, 7, 8, 8.1, 10 supported
Internet Connectivity	Required (HTTP access to uk.dxs-systems.com. HTTP GET and POST Methods allowed)
Internet Speed	10MB (Download), 10MB (Upload)

## 6.1 Introduction

Version 5.2.10 focuses on improvements to the search functionality, as well as improvements to the display of search results. The speed at which search results are displayed has been considerably improved, and the results are more comprehensive and accurate.

## 6.2 Enhancements

1. Search results have been categorised in sections.
2. Wildcards have been added, allowing for partial words to be used when searching.
3. Multiple keywords or search terms can now be used when searching for a document.
4. The ability to search for words within a pathway or guidance document has been added.
5. Signatures are scaled automatically if they are too large for the field.
6. Improved messages when failing to connect to the clinical system.
7. Documents converted to the new format are now cached for quicker access.
8. RBAC can be disabled for the synchronising of new sites/users.
9. The display of the draft watermark has been made more visible on forms.

## 6.3 Fixes

1. TFS-3784 – Fix for the filter functionality disappearing from the Forms section after searching.
2. TFS-3798 – Fix for the GMC number being replaced by the GMP number on certain setups.
3. TFS-3799 – Fix for filtering by the 'Assigned To' user also including other users.
4. TFS-3801 – Fix for the 'Save to Patient' confirmation being removed in the Medicines, Education and Services sections.
5. TFS-3806 – Fix for sorting in the Complete folder taking too long.
6. TFS-2820 – Fix for older forms not being able to reassign without being edited.
7. TFS-3826 – Fix for DXS Point-of-Care crashing when interacting with a Lookup-type field.

## 6.4 Known issues

1. PRB-18600 – PDP Appraisal Summary values slightly difficult to read when using the 'High Contrast' (non-default) Windows theme.
2. PRB-18711 – Content being cut off from the right side in print. Only a row of pixels is missing, and the text is completely legible. This only impacts SPCs and these are very unlikely to be printed.

## 6.5 Document changes

Category	Document	Updated
<b>Deployment</b>	DXS Centrally Hosted SQL Server
