Decodable Story

Spring

In spring, the frost and cold of winter begin to melt away. The days get longer and it begins to get warm.

In the spring season, new plants start to grow. Buds form on trees, grass grows, and we see weeds and shoots rise from the dirt. Lots of gardens get planted in the spring, too.

As plants start to grow, birds and bees come to drink nectar from the plants. The birds and bees pollinate the plants and help more plants to grow.

It is not only plants that grow in the spring. Lots of baby animals are born in the spring, too. We can see chicks and ducklings, baby goats (called kids), and tadpoles in the spring. It is common to see a bunny in the spring, too.

Spring can be a time with lots of rain, but it also has lots of sun. Spring is a nice time for hikes, riding bikes, playing baseball, and having picnics.

Spring begins in March and ends in June.

Word List

Spring

**The following R-controlled words
appear in this story:**

birds	form	March	start
born	gardens	more	warm
dirt	longer	nectar	winter
for			

**The following vowel team words
appear in this story:**

away	grow	season	too
bees	grows	see	trees
days	playing	shoots	weeds
goats	rain		

**The following high-frequency words
appear in this story:**

new
