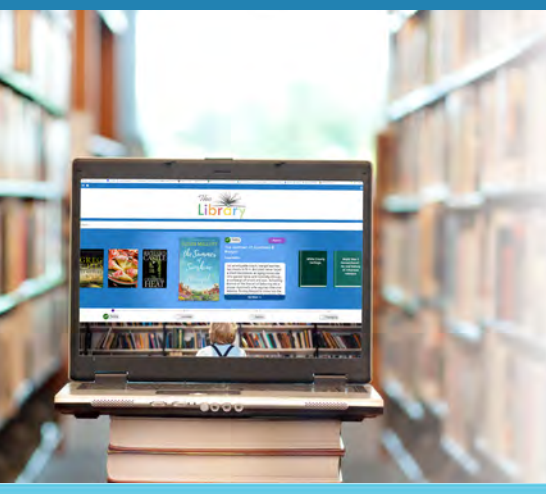
Discover a better way to search



Atriuum's Gallery OPAC: Drives Patron Engagement and Library Circulation Trends

Searching has never been easier! Your patrons will quickly discover and find more print, electronic and digital resources offered by the library. Get clear and concise results without confusion.

Your patrons will immediately see the difference with Gallery's mobile-responsive interface. The "eye-catching" enriched content drives patron engagement, increasing your library's circulation.

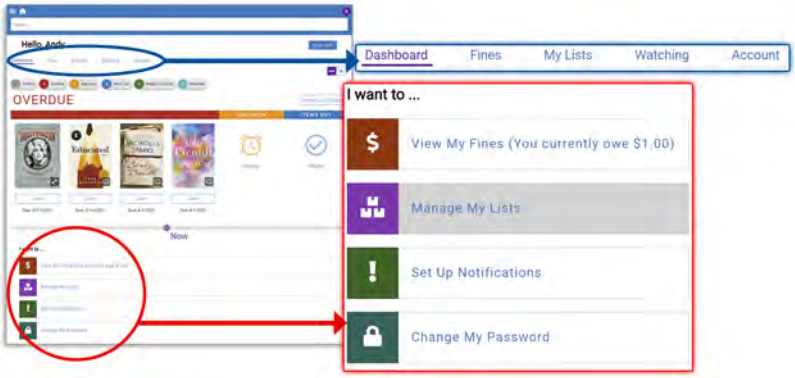
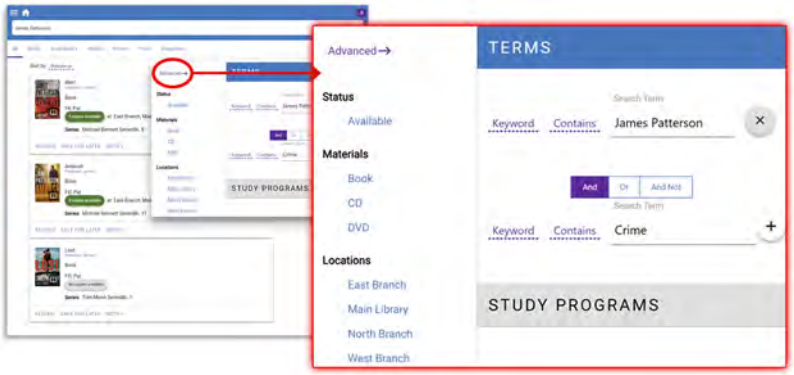
Book Systems® Gallery Features

Patron Account Dashboard

When a patron logs into their account, they are presented with a visual dashboard that instantly displays when items are overdue, due soon, out, ready for pickup and reserves. They can also manage their account, renew items, see fines owed, create and manage lists, set their user preference for email and text notifications, create watchlists, and change their password.



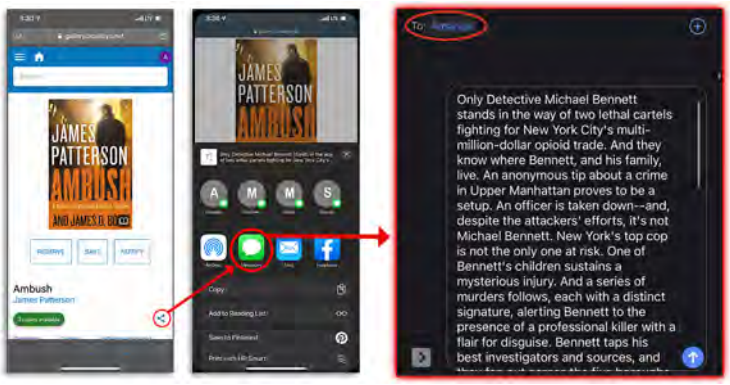


Intuitive Searching

Gallery uses intelligent search algorithms that adapt and intuitively learn what your patrons are searching for and provides your patrons an easy-to-use search interface. Patrons can quickly further narrow results using basic or advanced filtering.

Discover and Share

Patrons can readily discover and share items found in your catalog using native apps installed on their devices. They can use social media and peer/one-to-one sharing to enable and create "viral marketing" for your library.



Quilt Interactive Kids Catalog

Experience the next generation in an interactive and highly engaging kids catalog for your library. Quilt creates a “gamification” visual interface that displays dust jackets and search categories in a patchwork quilt design that engages young readers. The visual impact encourages them to explore and discover more and increases the circulation of your children’s materials.
