The secret behind pHix's fat burning potential is a natural, plant-based ingredient derived from a proprietary blend of Mature Hops Extracts (MHE) from the hops flower.

pHix is easy. Squeeze 1 pHix snap or dropper full into your favorite drink & activate your body's healing & fat-burning processes.

The **Mature Hops Extracts (MHE)** in pHix activates your metabolism and initiates thermogenesis, the body's natural way to burn visceral fat while retaining muscle mass. Each serving of pHix triggers up to 9 hours of potential fat burning, thermogenic response! Research on MHE and customer experience shows that MHE may also improve digestion, nutrient absorption and cognitive function, resulting in deeper, longer sleep, increased focus and more daily energy.
