

EBRD GREEN CITIES

EBRD's Green Cities Programme in the Czech Republic

EBRD Green Cities strives to build a better and more sustainable future for cities and their residents. The programme achieves this by identifying, prioritising and connecting cities' environmental challenges with sustainable infrastructure investments and policy measures.

With over EUR 1.5 billion in funding, the programme builds on the EBRD's proven track record in helping cities invest in sustainable municipal infrastructure. More than 40 cities have committed to becoming green.

Join us at this webinar to learn more about how to become an EBRD Green City!

Date: Thursday 27 May 2021
Time: 09.00-10.00 BST
Platform: Webex Events (hosted by EBRD)
