

# Skim Scan Customer Loyalty Program

*Your Skim Scan experiences the same wear and tear as any credit card and will typically need replacement after about two years of daily use. Just as a credit card's magnetic stripe fades, EMV chip contacts deteriorate, and edges become worn, the same three areas on your Skim Scan will gradually degrade with frequent handling.*

*Instead of purchasing a brand-new unit at full price, we're offering our loyal customers an exclusive trade-in program — exchange your worn Skim Scan for a brand-new replacement for only \$250 (including free UPS Ground shipping).*

## Essential Maintenance for Your Fraud Detection Tool

Your Skim Scan protects you from card skimmers at:

- ✓ ATMs
- ✓ Gas pumps
- ✓ Store checkout terminals

### Critical Wear Points

#### 1. Circuit Board Damage

- Repeated insertions expose electrical traces
- Causes detection failures
- Excessive wear requires full replacement

#### 2. Magnetic Tape (ATM Use Only)

- Located at circuit board's end (ATM-only function)
- **DO NOT REMOVE** (common customer mistake)
- Tape replacement must be done at our facility

### Replacement Program

#### \$250 Service Includes:

- Protective pouch/holster for each unit returned
- New circuit board
- Full diagnostic testing
- **Mandatory trade-in** of your old unit

### Simple Service Process

Contact Our Team:

732-548-3737

support@bvsystems.com

#### We'll Determine

- If electronic component replacement/repair is needed
- If tape service is sufficient
- Or if full replacement (\$250) is required

**Your Skim Scan is the first line of defense against skimmers at ATMs, gas pumps, and retail checkouts. Thank you for helping combat card fraud.**
