

CABLEMATIC

Pet Bathing Massaging Glove - Manual

Model Number: QL-018

Materials: environmentally silica gel + Nylon Upper + Environmental PVC

Features:

1. Put on the glove when it is time to bathe your pet. After you connected to the water source, water will splash from the middle of glove. An additional tube to bathe your pet is not necessary, which will free your other hand.
2. On the glove itself you will find 12mm long raised tooth. With them you can massage your pet during bathing, and improve the blood circulation.
3. Before bathing you can also use these 'teeth' to tidy pets fur.
4. With a water impact of 10mm, you can get to the roots of pets fur, which will guarantee deep cleaning. It is much more hygienic and perfect for pets with long fur.

Product usage:

1. Unpack the package and confirm that all accessories are included. (see attached map)
2. After unpacking, turn off the water switch of glove. (see attached map)
3. Choose the right faucet adapter. The wider end will be connected to your water faucet and the narrow end has to be connected with the interface of the product.
4. Turn on your water faucet, put on the glove and open its water switch. Then water will splash out from glove.
5. Move the glove gently back and forward to massage your pet.

Product accessories: Glove x 1 、 Adapter x 3
