

Product Description

.Product name SMD5050 [LED Neon Light](#)

.Voltage 12V,24V,110V,120V,220V,240V

.Power 3.5W

.Material Epistar chip, copper core, environment PVC glue stock

.Size 14*24mm

.Element length 1m/unit

.Light source SMD5050

.LED Qty□80pcs/m

.Color □pink, orange, warm white, green , blue, white, red, high brithness
red□yellow, high brightness yellow, full color

.IP rate□IP65

.Life span□20000H

.Packing □50m/box□Boxes size : 36*36*32.5CM

LED Neon light characteristic as following :

- 1□ Low voltage, low-energy , because use LED sources, so if lower 24v ,also can use as normal , consumed power is 3.5W/M(red color□yellow color),4.8W/M(blue color□green color□white color□warm white□pink)
- 2□High light , use super high brightness 5mmLED in series, each meters have80pcs lamp or 100pcs lamp arrange can make sure the whole lights glowing effect.
- 3□Longevity and durable, can up to 100,000 hours
- 4□Energy conservation , can save above 70% energy consumption using cost .
- 5□LED neon light soft ,easy to install , can bend minimum diameter as 8cm also can cut at any scissor mouth . so it can bent to many kinds of letter ,pictures etc.
- 6□Safe , having quakeproof ,lower heat dissipation .
