RGB SLIDER

The RGB Slider is a compact midi-ATX case with a sleek look. While the PC case focuses on the essentials, it still has some advantages to offer which set it apart from other cases in its class. Thanks to the black finish and its simple form, it is pleasantly discreet and unassuming. However, the case also has highlights such as the side panel made of tempered glass, the I/O panel with two USB 3.0 ports, and the RGB LED strip integrated in the front panel. If the manual color control is used, the strip can be lit in 14 different lighting modes. When it comes to internal installation options, the RGB Slider also offers more than meets the eye.

Features

SIMPLE YET STYLISH FRONT PANEL

The matte black front panel of the case is decorated with an RGB LED strip which complements the minimalist look with flowing, luminescent colors. The strip appears to be gently sliding across its middle, which is where the case gets its name, and can be illuminated in 14 preset modes via the integrated RGB controller. Alternatively, it can be customized through compatible mainboards, using Asus Aura Sync, MSI Mystic Light Sync, Gigabyte Fusion and ASRock Polychrome SYNC. The built-in RGB controller also makes it possible to use additional RGB components which have a 5V-D-Coded-G or 5V-D-G pinout.

A CRYSTAL-CLEAR PRESENTATION FOR HARDWARE

An unobstructed view of the installed hardware is possible through the left side. This is ensured by the side panel of the case, which is made entirely of tempered glass. So that nothing obscures the view, and the built-in components come into their own, there are no visible screws on the side panel. The attachment is at the rear of the case and therefore out of the field of view.

OPTIMAL AIR INTAKE POSSIBILITIES

The RGB Slider is designed to offer sufficient installation possibilities to ensure optimal airflow. A 120 mm fan is pre-installed at the back of the case, ready to discharge warm air outside. If desired, more fans can be installed within the case: There is room behind the front panel for up to three optional 120 mm fans. Two 120 mm fans or two larger 140 mm fans can also be installed under the top panel.

SPACE FOR STORAGE SPACE

For all PC owners with a preference for a lot of storage space, there are plenty of locations for storage drives in the RGB Slider. Three compact SSDs can be mounted either on the mainboard tray or on the power supply tunnel. Two 3.5“ HDDs can be installed in the HDD/SSD cage, which can, of course, also accommodate SSDs if required.

SUITABLE FOR LARGER HARDWARE COMPONENTS

With its compact size, the RGB Slider can be easily integrated into smaller setups or ones that are kept intentionally minimalist. Nevertheless, larger hardware components can also be easily installed in the case. The CPU cooler can be up to 15.7 cm in size, which leaves enough space for graphics cards up to 33.5 cm long.

Specifications

Product Name	RGB SLIDER
Color Versions	Black, White
Available Versions	RGB
Form Factor	ATX
Dimensions (L x W x H)	40.0 x 19.0 x 45.6 cm
Weight	4.85 kg
Tool-Free Devices Installation	✓
Side Panel	Tempered Glass
Interior Painting	✓
Cable Management System	✓
Expansion Slots	7

I/O

USB 3.0 (Top): 2 | USB 2.0 (Top): 1 | Audio (Top): ✓

Max. Drive Bays

2 x 3.5“ | 5 x 2.5“

Fan Configuration

Front Panel	3x 120 mm Fans (Optional)
Rear Panel	1x 120 mm Fan (Pre-Installed)
Top Panel	2x 120 mm or 2x 140 mm Fans (Optional)

RGB Compatibility

Type	Addressable
Ports	2
Manual Control	14 Modes
Mainboard Compatibility	MSI Mystic Light Sync, ASUS Aura Sync, Gigabyte RGB Fusion Ready, ASRock Polychrome Sync
RGB Pinout	5V-D-G & 5V-D-coded-G

Compatibility

Mainboard	Mini-ITX, Micro-ATX, ATX
Max. Length Graphics Cards	31.0 / 33.5 cm*
Max. Height CPU Cooler	15.7 cm
Max. Length Power Supply	17.5 cm

Package Contents

RGB SLIDER, Accessory Set, Manual

EAN Code

RGB SLIDER Black	4044951029846
RGB SLIDER White	4044951032006

* Without front fan
