Sharkoon

LIGHT² S

The Light² S combines a distinctly low weight with an ergonomically uniform design, which can be used with either the left or the right hand. Thanks to its honeycomb structure, the gaming mouse achieves a firm grip and an absolutely low weight of only 78 grams, providing intuitive and comfortable use for hours of gaming. Thanks to a powerful optical sensor with up to 6,200 DPI and eight freely assignable mouse buttons, the gaming mouse is suitable for various genres and playing styles.

Features

AMBIDEXTROUS DESIGN
The Light² S provides a featherlight sensation when gaming for both left and right-handers. Thanks to its completely symmetrical design, it can be used with the preferred hand along with the preferred grip. The uniform shape of the gaming mouse rests comfortably in the hand and, together with the special honeycomb structure, ensures a firm grip, regardless of whether it is left or right.

FEATHERLIGHT PERFORMANCE
As a gaming mouse from the Light² series, the Light² S also has a clearly noticeable low weight. Thanks to its honeycomb shell, it weighs only 78 grams, making it pleasantly light in the hand. Despite its lightness, the mouse is extremely robust thanks to its symmetrical shape and the special design of the outer shell.

FLEXIBILITY WITHOUT LIMITS
The handling of the Light² S benefits in particular from its light weight. For uninterrupted gaming fun and high speed, the four mouse feet are made of 100 percent PTFE, allowing the mouse to slide smoothly over the mouse pad. More flexibility and almost unrestricted freedom of movement are achieved with an ultraflexible, textile braided cable.

DESIGNED FOR PRECISION
For precise aiming and tracking, the Light² S deploys its optical PixArt PAW3327 sensor. This provides a resolution of up to 6,200 DPI, which, via the Light² S software, can be freely adjusted and saved in five steps. Together with eight freely assignable buttons, the mouse is suitable for a wide range of applications and can be adapted to the requirements of different game genres.

CHIC LIGHTING
The elegantly symmetrical shape of the Light² S is complemented by the atmospheric RGB illumination. A strip of light runs from one mouse button to the other around the Light² S, emphasizing its streamlined design. Using the software for the Light² S, the illumination can also be customized for personal style with a variety of effects and colors from the entire RGB spectrum.

Specifications

Product Name	Light² S
Max. DPI/CPI	6,200
Min. DPI/CPI	200
DPI Steps	600/ 1,800/ 3,000/ 4,200/ 6,200
Sensor	Optical
Chip	PixArt PAW3327
Lighting Effect	RGB
Max. Polling Rate	1,000 Hz
Frames Per Second	6,200
Inches Per Second	220
Max. Acceleration	30 g
Mouse Feet	4, 100 % PTFE
Weight without Cable	78 g
Dimensions (L x W x H)	126 x 66 x 40 mm
Supported Operating Systems	Windows

Button Properties

Number of Buttons	8
Programmable Buttons	8
Durable Omron Switches in Left and Right Mouse Buttons	✓
