

GAMING DAC PRO S

Instant Upgrade for your Headset

INSTANT UPGRADE FOR YOUR HEADSET

The Gaming DAC Pro S turns ordinary headsets and headphones into high-performance sound systems. A certified high-resolution sampling frequency with a correspondingly high bit depth ensures crystal-clear voice transmission and an immersive sound with breathtakingly differentiated details. Its high signal-to-noise ratio of 100 decibels is outstanding in its class. In addition, the Gaming DAC Pro S is not only super compact, but it can also be conveniently connected, via USB and TRRS plugs, to all standard PC systems, consoles, headphones and headsets.

DAC AND PLAY

The Gaming DAC Pro S has the compact format of a common USB flash drive and be carried around just as easily. It can be inconspicuously attached between PC and headset while at the same providing a significant enhancement to the sound.

ALUMINIUM CASE

STATUS LED FOR
SAMPLING FREQUENCY

3.5 MM STEREO JACK (TRRS)

MINIMAL WEIGHT OF
ONLY 8 GRAMS

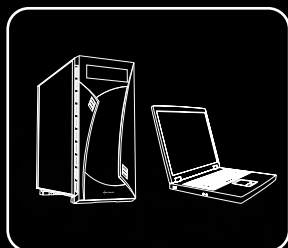

A LIGHTWEIGHT WITH POWER

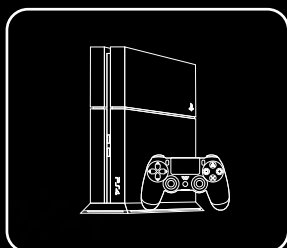

Due to the high output voltage of 2 volts, the Gaming DAC Pro S has enough reserve capacity to reproduce the full dynamic of the gaming sound - without the loss of important details - also on 300 Ohm headsets. With a total harmonic distortion (THD+N) of only 0.002 %, the device will meet the most exacting requirements.

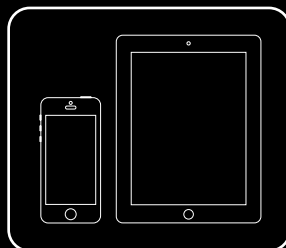

COMPATIBLE WITH:

PC / Laptop
(Windows, macOS)

PS4

Smartphone / Tablet*
(Android)

*With separately available OTG adapter

IMMERSIVE GAMING

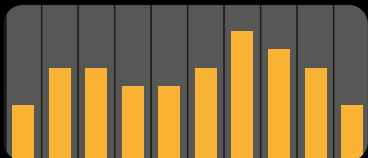

The high-resolution sampling frequency of 96 kilohertz allows acoustic details to be experienced to the full. In addition to an audiophile listening experience, this performance also enables the differentiated and accurate determination of the direction and distance of ambient sounds as well as clear voice transmission in gaming.

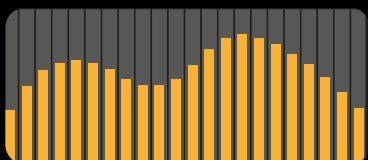

CERTIFIED FOR A HIGH-RESOLUTION EXPERIENCE

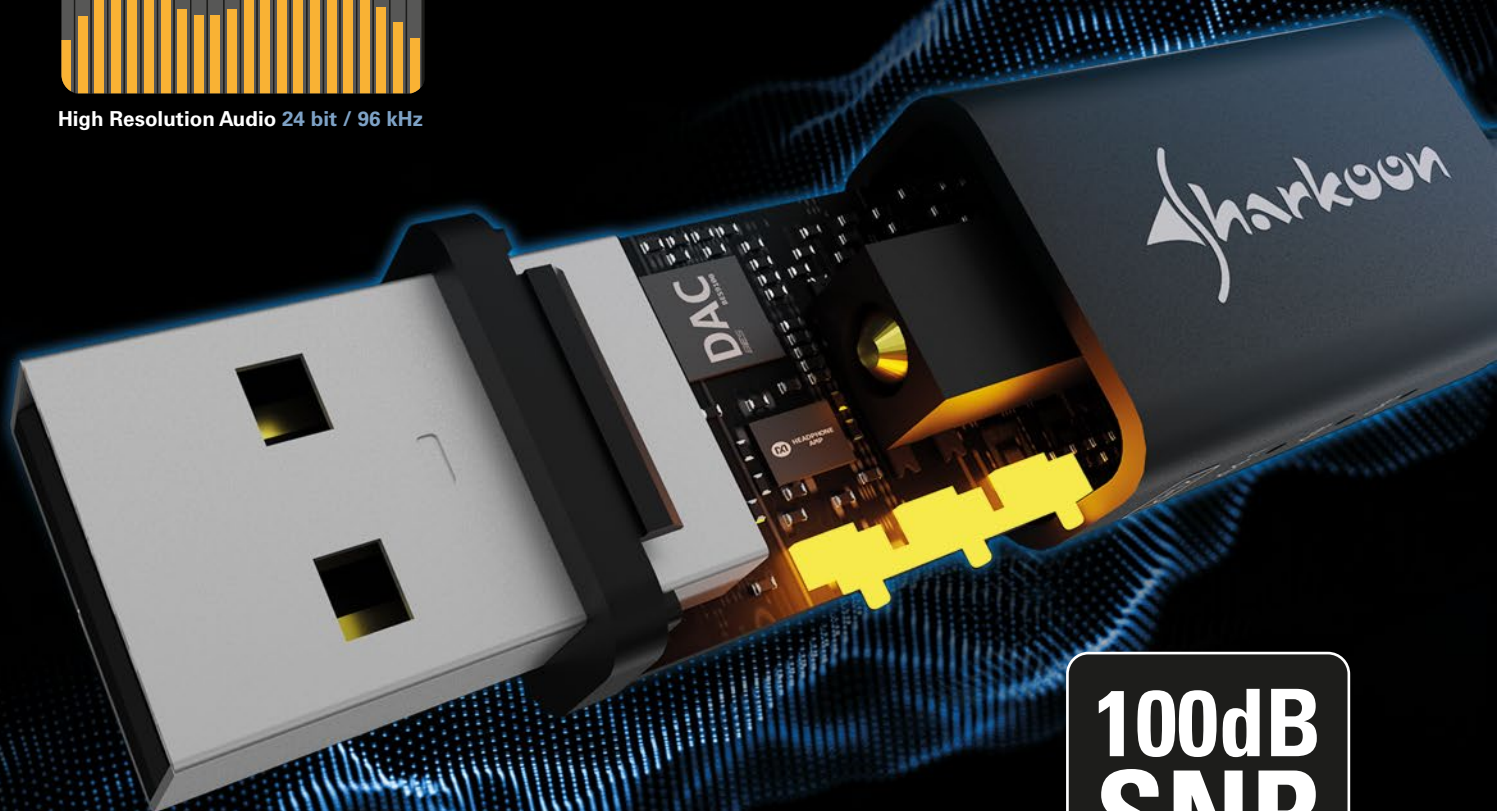

The Gaming DAC Pro S is certified according to the requirements of the Japan Audio Society (JAS) for modern and high-resolution audio attributes. This is the guarantee of a high sampling frequency and a sound dynamic which achieves studio quality.

CD Quality 16 bit / 44.1 kHz

High Resolution Audio 24 bit / 96 kHz

**100dB
SNR**

UNDISTURBED, CLEAR SOUND

The Gaming DAC Pro S provides an alternative to native sound cards. Noise from the power supply is avoided and a crystal-clear sound is ensured by an excellent signal-to-noise ratio of 100 decibels.

SPECIFICATIONS

General:

■ Type:	External Sound Card
■ Sound Chip:	BES3100 + MAX97220A
■ Connector:	USB 2.0 (Type A Plug)
■ Output Voltage:	2.0 V
■ Impedance:	16 - 300 Ω
■ Max. Power:	250 mW
■ Signal-to-Noise Ratio (SNR):	100 dB
■ Total Harmonic Distortion (THD+N):	0.002 %
■ Sampling Frequency:	24 Bit / 96 kHz
■ Power Supply:	USB
■ Weight:	8 g
■ Dimensions (L x W x H):	42.0 x 17.3 x 9.7 mm
■ Supported Operating Systems:	Windows, macOS, Linux, Android

Cable and Connectors:

■ Interfaces:	3.5 mm TRRS
■ TRRS Compatible (CTIA):	✓
■ Gold-Plated Connectors:	✓

Compatibility:

■ PCs/Notebooks:	✓
■ PlayStation 4:	✓

Package Contents:

■ Gaming DAC Pro S	
■ Manual
