

X-REST ALU

With the X-Rest ALU, headsets and headphones will find the perfect spot on top of the desk. The slim headset stand made of aluminium will help keep things neat and tidy, while, at the same time, it stays in the background and draws all the attention to the headset.

Features

MINIMALISTIC DESIGN

The X-Rest ALU helps avoid desktop clutter and, with its inconspicuous design, puts headsets into the limelight. It will complement any kind of setup while hardly taking up any additional space on the tabletop. With its straight contours, the headset stand has an especially space-saving yet also stable design.

USECURE AND NONSLIP

The silicone feet of the X-Rest ALU provide stability on all even desktop surfaces. The headset rests on the top of the stand while its silicone pad and raised, inclined ends guarantee a secure hold for the headsets or headphones.
