

Series pickup manual

All Series pickup

The pickup is a brand new high-sensitivity pickup parts, is designed for monitoring, burglar alarm security system complete professional recording products are designed for monitoring within the normal range and recording, monitoring range of 10 to 150 square meters, part of the model sensitivity adjustable.

This product has a high sensitivity, low noise, low distortion, small size, power reverse protection circuit, power consumption is small, transmission distance, the connection is simple and convenient, can be a wide range of monitoring. Can be widely used in banking, finance, shopping malls, prisons, justice, classrooms, conference rooms, industrial production, military areas, and many other places.

Red wire ---Power + Black wire—Power—
Green wire--- signal+ Black wire--- signal—

Technical Specifications:

Working Voltage DC6~14 , Current consumption 6mA
Frequency range 100~10000HZ , Frequency response 2.5dB
Output impedance 600 Ohm , Output Level 2~5V upp
