Notes

- Damages caused by the disregard of this user manual are not subject to warranty .The dealer will not responsible for any resulting defects or problems.
- The heavier weight will produce greater friction,resulting in slower rotation speed.
- Do not overload on the turntable.
- The ambient temperature must always be between -5°C to +45°C. Use under indoor dry condition .
- Never touch the device with wet hands, as it could lead to mortal electrical shock or injury.
- Any unauthorized modifications on the device is forbidden due to safety consideration.
- Normal noise value within 55 decibels during product operation.
- Considering longer service life, the product should be suspended around 2 hours in case it has been working for more than 8 hours continuously.

Maintenance and repair

- Disconnect from mains before starting maintenance operation.
- We recommend a frequent cleaning of the device. Please use a soft lint-free dry cloth. Never use alcohol or solvents.
- Maintenance should be carried out by qualified professionals only .
- Please use the original packing for transportation in case the turntable need maintenance by manufacturer.
- Should you need any spare parts, please contact us.
