USR-TCP232-200 Serial to Ethernet Device Server

USR-TCP232-200 Introduction

It is a data transparent transmission equipment for converting TCP or UDP socket data to serial RS232.

It has characters of low price, low power consumption, 32 bits ARM on board, high speed and high stability.

USR-TCP232-200 Features

- 10/100M auto detect interface, 5 V RS232 level
- Support AUTO MDI/MDIX , Can use a crossover cable or parallel cable connection
- Work model: TCP Server / TCP Client / UDP Server / UDP Client
- Network protocol: ETHERNET / ARP / IP / UDP / TCP / ICMP
- Unique heartbeat package mechanism to ensure connection is reliable, put an end to connect feign death.
- Can work in LAN, also can work on the Internet
- Across the gateway, across switches, routers.
- Under UDP mode, Packet Broadcast is prohibited, with stronger anti-interference ability.
- Transmission distance: RS232 – 15 meters
- Virtual serial port supported

USR-TCP232-200 Size (Unit: mm)

| **Accessories**                       |
| Power Adapter | 5V1A                             |
| DB9 cable     | Null                             |

| **More**                              |
| Certificate | CE, FCC                           |
| Warranty    | 2 Years                           |
