HOT-PLUGGING AND ADVANCED MOUSE& KEYBOARD SUPPORT

4-port 19" Rackmount KVM Switch w/ Front-panel Buttons and Keyboard Hotkey Control

UKV-1480 Rackmount KVM Switch

This UKV-1480 KVM Switch is designed for computer/server management on a centralized single admin desk in corporate, factory as well as in campus computing environment. It also features a **hot-plugging** capability that allows you to plug off and on the KVM cablings without powering down a whole rack of servers, especially convenient when you are working on a sever rack.

## Robust and Reliable for Corporate Server Room / Industrial Floor

The UKV-1480 Rackmount KVM Switch is robust and durable in metal enclosure and provides better shielding against electromagnetic interference commonly seen in lab or factory environments. The metal case offers a sturdy protection needed to withstand accidental impact.

Centralized Rackmount Management

The UKV-1480 features a console port to connect your shared keyboard, video and mouse, and 4 PC ports to connect to your computers/servers. The rackmount design offers a neat placement of the KVM Switch units on the rack for centralized management and also for security enhancement that could be provided by a locked server room. You can simply place it on desktop or mount it on a standard 19" rack for more secured and centralized management.

Features

- 4-port 19" Rackmount KVM switch in metal enclosure
- PS/2 style keyboard and mouse control
- Support Microsoft IntelliMouse®, IntelliMouse Explorer®, Logitech NetMouse® and other compatibles
- Direct channel selection and operation using Front-panel push buttons and keyboard hotkeys
