

2-port DVI KVM Switch w/ Front-panel Button and Keyboard Hotkey Control

UDV-002 DVI KVM Switch

The UDV-002 DVI KVM Switch is designed specifically for sharing a DVI Monitor/Flat Panel Display between two DVI-enabled PCs. You can use it to control two DVI-enabled PCs using only one keyboard, mouse and DVI monitor/Flat Panel Display.

DVI interface technology to ensure digitally crisp and clean imaging

The DVI interface technology is tailored to modern digital Flat Panel Display. It implements genuinely digital signal transmission over the cable to reduce undesired distortion from conventional analog/digital conversion.

Robust and reliable with metal enclosure

The UDV-002 DVI KVM Switch is robust and durable in metal enclosure, suitable for use in environments pervasive with electromagnetic interference and wherever a sturdy protective metal case is needed to withstand possible impact.
