

2-Port Video Splitter

This product is a signal booster and duplicator which can take video input from a single source, broadcast and display it on two (2) monitors using analog signals in a distance up to 180 feet. It features a signal bandwidth of 450MHz; it is almost 60 times greater than a simple TV to apply. High resolution setting of 2048x1536 in 24 or 32-bit true color mode will also secure the high quality of the video graphic images to be displaying. It's ideal for an environment of education, meeting and commercial demonstration.
