

The VVD wants Eindhoven to be and remain an attractive city, for its current residents, but also for new ones, students and internationals. In addition, Eindhoven must be an attractive business location. Good facilities help increase this attractiveness.

## A SAFE CITY!

Safety in Eindhoven must be improved. A key task of the municipality is to protect its inhabitants. Cameras are here for our safety, but also to ensure the safety of our law enforcement professionals. That is why the VVD Eindhoven wants to introduce body-cams to monitor and prevent aggression. Residents who play an active role in the community must be supported by neighbourhood prevention teams.

A drug lab has no place in your neighbourhood. This leads to nuisance and fire hazards and has consequences for public health and safety. That's why we want extra police deployment in the search for drug labs. We want to use the money taken from criminals for local neighborhood projects.

## AN ACCESSIBLE CITY CENTER

The roads in and around Eindhoven are congested. Closing the Vestdijk (home to the Hub and Expat Center) for example, does not help in resolving this issue! Accessibility is crucial to support businesses and recreation and to ensure Eindhoven is a city where you can live comfortably. As you know Dutch people love to cycle. We want our citizens to cycle safely!

For a good business climate it is important that we are able to easily hop on a train to Düsseldorf, catch a plane to London or a bus to the High Tech Campus. This does not change the fact that motorists are also welcome in Eindhoven, both in the center and in residential areas.

**FOR A  
FUTURE-PROOF  
EINDHOVEN!**

## A VIBRANT CITY

Eindhoven is a vibrant city. Popular events such as King's Day, GLOW and the Dutch Design Week continue to innovate. We must continue our efforts to bring outdoor festivals and sporting events such as the European Hockey League to the city. There should also be room for small events to be organized. That is why the VVD wants to replace permits with a notification.

## A CITY YOU WANT TO LIVE IN

Eindhoven is a great city to live in. Everyone should be given the opportunity to find a home that fits their needs. Skewed income-to-rent ratios must be prevented by giving tenants the opportunity to buy their home.

## A MUNICIPALITY WHICH IS THERE FOR YOU

Over the last four years, Eindhoven has structurally spent more money than it has received. This cannot be maintained. The VVD Eindhoven wants the municipality to cut costs and does not want taxes for our residents to go up. For residents, services from the municipality must be modernized. The VVD is committed to digital processing (of passports for example), while still taking into account residents who are less digitally skilled.

## THE ENGINE OF THE ECONOMY

Eindhoven is the engine of the Dutch economy. The VVD Eindhoven is proud of our innovations, which are leading the way in the world. Eindhoven is the best location for innovative technological companies and start-ups.

A good business climate is of great importance so that High Tech companies (continue to) come to Eindhoven. Economic growth creates more jobs, enabling more people to work in Eindhoven. People who currently rely

# FOR A FUTURE-PROOF EINDHOVEN!

on social welfare must be encouraged to get back to work. The municipality has the means to prepare these people for the job market.

## EXCELLENT SPORTS & CULTURE

Eindhoven has wonderful facilities for sports and culture. The VVD Eindhoven wants to ensure these facilities remain available to Eindhoven residents. Sport facilities can be utilized better by having activities take place at all times of the day. These can be organized by schools, local communities and other organizations. In addition, there must be regional and national recognition for cultural institutions such as the Van Abbemuseum.

## A CITY FULL OF STUDENTS

Eindhoven is a student city! In Eindhoven we have, among other institutions, the Summa College, Fontys University of applied science and the Technical University. We believe that licenses for small and annually recurring events such as the Hajraa Student tournament should be abolished. The Eindhoven VVD is also in favour of more flexible opening hours for bars and cafes.

## A SOCIAL CITY

In Eindhoven everyone gets the care that he or she needs. The VVD Eindhoven condemns profiteering in the health care sector, which must be banished. This can be done by making stricter agreements with care providers. This will also ensure a good standard of care in the future.

## A SUSTAINABLE CITY

Eindhoven is the city that can put sustainability on the agenda, by linking it to innovation and corporate activity. New buildings will no longer have a standard connection to the gas grid and energy-saving initiatives from homeowners will be encouraged.
