

► **Keep Oegstgeest Viable & Green**

Election programme 2022-2026

► Summary

The VVD has achieved a lot for the residents of Oegstgeest over the past ten years, including multiple residential construction projects, investments in sports, and a more solid financial base for the future. We are happy and proud about that. We want to keep going in the next four years, to make sure Oegstgeest stays in the top-10 of best municipalities in the Netherlands. To achieve this, the VVD Oegstgeest has set out four priorities. The necessary investments require extra money but are necessary to keep Oegstgeest viable and green in the foreseeable future. Our priorities are:

► Keep it green, build with focus

The boundaries of maximum growth have almost been reached. We should keep our small-town character and existing greenery. The population density of Oegstgeest is already part of the top five percent of all Dutch municipalities. After a decade of building there is not much space left to continue building.

► Invest in facilities

The VVD wants to invest in important facilities, such as a new Leo Kannerschool, the Gevers-Deuts Terweeschool, bridges, greenery, infrastructure, library, moving the high voltage cables underground, recreation at Klinkerbergerplas, playgrounds, skateparks and the preparations for a new swimming pool Poelmeer. This will cause an increasing debt, but it will remain within a responsible debt ceiling.

► Independence

We want to keep Oegstgeest just as lovely as it is now. In order to achieve this, the VVD Oegstgeest wants to remain an independent municipality with its own governance. We want to be able to decide about our own environment.

► Affordable energy transition

We strive for a doable and affordable energy transition within our town. For this we want to keep a minimum of two options open: residual heat and hydrogen. We are open to any other realistic solution.

► Apart from these four priorities, the VVD Oegstgeest cares about **Finance & Economy**, **Living Environment**, **Safety** and **Social Town**.

► In short

The VVD Oegstgeest stands for:

- A municipality which keeps its greenery and focuses where they build
- A municipality which invests in important facilities
- A municipality which stays independent
- A municipality which achieves an affordable energy transition for its residents and businesses

We need your support and voice.

Vote VVD!

Thank you in advance.
