

## **It's all about housing!**

- A thousand new houses, for buying and renting, in the next four years!
- Affordable starter and mid-market homes and transitional opportunities for the elderly.  
That way everyone can find an affordable and suitable home in Waalre.
- In addition, we want to make it easier to adapt existing homes, so that people can continue to live independently.

## **A good home is a safe home!**

- Good living in Waalre also means safety. We want to increase the visibility of police in the neighborhoods and the countryside
- That's why we want to further expand police capacity.

## **Sustainable energy**

- We have clearly spoken out against large scale windmills at the Gat van Waalre.
- Instead, we want to generate sustainable energy on a small scale, for example through solar panels on roofs or via initiatives of residents and entrepreneurs. They should be given the space to do so.

## **The city's centre and our entrepreneurs**

- We want to invest in an attractive and safe city centre, such as Den Hof in Aalst and De Bus in Waalre, where visitors and residents like to be guests. Free parking is, obviously, an integral part of that.
- It's our local entrepreneurs who really make the heart of Aalst and Waalre sparkle. That is why we want to give them space, especially in these difficult Covid times.

## **Solid municipal finances**

- Obviously, we want to have the municipal finances in order. It makes sense to us that we don't spend more than we take in.
- Housing taxes, such as the OZB tax, remain as low as possible.
